2022 Alabama Wage And Salary Survey

County

December 2022

<u>ACKNOWLEDGEMENT</u>

BACKGROUND

There is a continuing need for reliable and current wage and salary information that provides the granularity necessary to support ongoing work of local cities and counties in the state.

In 2021, the Association of County Commissioners of Alabama (ACCA), the Alabama League of Municipalities (ALM), and the Alabama Association of Public Personnel Administrators (AAPPA) partnered with the Government and Economic Development Institute (GEDI) at Auburn University, in a collaborative effort. The purpose of the partnership was to conduct a wage and salary survey and study, resulting in a report to provide organizations, both city and county, with updated and useful wage and salary information.

Participation by partner member organizations was solicited. Member organizations submitted their data to GEDI for processing and integration into master data files for cities and counties. The window for participation in this year's survey went from January 2022 to December 2022.

PARTICIPATION SOLICITATION

Initial letters from the partnering organizations were sent by email to the partner organization membership in the first weeks of the project requesting maximum participation in the wage and salary survey. Follow-on requests for participation were throughout the window for participation.

OPTIONS FOR PARTICPATION

Considering social distancing and other work limitations due to the COVID-19 pandemic, organizations were asked to use <u>one</u> of the following options to submit their survey responses. These options are listed in order of preference for ease of participation.

Option1.
: Provide GEDI with an electronic copy of your current classification plan and pay plan with the number of employees in each job (no employee names, please). GEDI will extract the information from these documents.

Option 2.
: Provide GEDI with an internet address where your current classification and pay plan can be accessed and extract the required information.

Option 3.
: Provide GEDI with a link to your organizations HR information system (i.e. NEOGOV) where GEDI team members can research, and extract required information.

Option 4.
: GEDI provides access to an electronic survey for your organization to complete and transmit the survey information to GEDI.

Option 5.
: GEDI mails a hardcopy of the survey for participants to complete and return (GEDI will support this option by direct request from participants and will include a postage paid envelope for return).

2022 PARTICIPATION RESPONSE

County Report

Fifty-one (51) counties participated in the 2022 survey; this represents 76.12% of the sixty-seven (67) Alabama counties.

Wage and Salary information was gathered predominately through three of the options - GEDI receiving electronic copies of classification and pay plans, using the GEDI designed survey questionnaire, and data pulled from third-party sources.

The GEDI survey, as reflected in this report, asks for weekly and annual hours worked, as well as hourly wages and annual salaries. Where this information was absent, a standard assumption of a 40-hour workweek/2080-hours worked annually was applied. This assumption also applies to jobs that typically have a varied number of hours such as public safety jobs (Sheriff Offices) unless the different hours were provided in the data received by participating organizations. Please take this into consideration when comparing your locality to others.

DATA PRESENTATION

The data in the report is presented by Job Title. Job titles were reviewed and consolidated where the job functions were similar. County data is also shown by county populations using the following population categories:

- 100K or more   (A)
- 75K to 100K   (B)
- 50k to 75K   (C)
- 25K to 50K   (D)
- 19K to 25K   (E)
- Under 19K   (F)

GEDI used a common set of job titles to make comparisons between municipalities easier. There is no guarantee that the job titles presented in this report are an all-inclusive list of occupational job titles in every organization. We look forward to and appreciate your feedback as this can only make future surveys more accurate.

County Wage and Salary Report
