

RANDOLPH COUNTY IS SEEKING A FULL-TIME ASSISTANT ENGINEER.

Looking to take your engineering career to the next level? Join us as the Assistant County Engineer and take on an essential role in overseeing the construction and maintenance of County roads and bridges, managing major County road and bridge construction projects, and ensuring that all projects are completed in accordance with applicable regulatory standards.

As the ideal candidate, you should possess a comprehensive understanding of engineering principles and practices, excellent communication skills, and the ability to manage multiple tasks efficiently. You should also have an Engineer Intern degree in Civil Engineering or a related field, relevant work experience, and the ability to earn a professional engineering license.

This is a fantastic opportunity to contribute to your community's infrastructure and make a positive impact. Apply now to become part of our team and take the first step towards an exciting new career!
